Do you work with young people who would like to get more involved with their community?

YV is a new youth volunteering programme which aims to allow young people aged 11-25 to access the benefits of volunteering.

We can support young people with mental health problems, SEN, those who are disengaged from their community or at risk of becoming NEET.

YV is free to all service users.

Get in touch to discuss how we can help your young people.

Young Volunteers

Young Volunteers Project for 11-25 year olds

Group and project work

We offer a bespoke service for your school or college group over a half term or longer, delivering workshops on what volunteering is and how it can benefit young people. Help with planning and delivering a social action project with an evaluation session afterwards.

This is for young people who have mental health problems, low self esteem or who feel isolated from their community. This strand will empower young people to make decisions and run their own event.

Please note that support from staff will be required to maintain staffing levels and to assist with students.

One-to-one support

We offer targeted support for young people aged 13-25. This is a referral only strand for young people who need additional help and support to access volunteering placements.

◊ Initial meeting
◊ Conversations around skills, ambition and support needs
◊ Help to find a suitable placement
◊ Ongoing review and development meetings

Based around the young person's interests, this strand aims to improve social engagement and confidence. Usually the volunteering will take place outside of the school or college.

Benefits of Volunteering

Increased sense of self worth

Learn new skills

Make a difference

Build up a CV or UCAS application

Try out possible careers

Put skills into practice

See the difference you can make!

"I like volunteering because helping others makes me feel better about myself because I'm doing something useful."
